

50-ohm ports. C1/L1 and L3/C3 form series resonators; L2 || C2 is the shunt resonator.

Bottom copper is continuous GND. C/L values must match design.json and BOM.

SIMULATION ONLY: capacitors, PCB and launches use estimated parasitics. Tune after measurement.

CH0 -> J1; J2 -> CH1. SMA shields connect to GND. No DC power required.

UNBUILT PROTOTYPE — nominal values compensate estimated parasitics
